## Open position: Let's build an English Academy for the Future

### M.A.D Education

“Hi, I think English education should be about communication.”

“Arts is important, let us synthesis arts into English education.”

“How about bring science into ESL (English as the second language) class?”

**IF you value** arts, science, math as much as we do; if you view learning a second language as an opportunity for children to explore a broader world; you share the same vision as M.A.D does.

An English Academy should be more than teaching the grammatical rule. M.A.D focus on the whole-person development, focus on the language competence, scientific competence, and Mathematical competence of the students.

An English teacher should be more than a knowledge presenter. M.A.D's teachers are experts in different subjects, we create classes where the children could explore the external environment, and develop their personality and capability. We accompany the children in the adventures.

**IF you are looking for** an opportunity to meaningfully spend your summer, a place to develop with the children, if you are willing to make contribution to the ESL education in China. M.A.D provides such a platform for you.

**At M.A.D**, teachers, executives, and parents work jointly to create a dynamic learning center for K-12 students. The executives provide support, resources, and assistance for the teachers to carry out their teaching philosophy. The teachers make use of their specialties to establish an interdisciplinary course system, to close the achievement gap for the students, and to assess the students' performance and progresses. The parents make contribution to the courses by consistently engage into the whole process. With a small-class learning setting, every teacher will enjoy the pleasure of engaging with students without worrying about being under huge pressure.

**Open positions** to all passionate educational practitioners and Curriculum designers.

### **01: Curriculum designers**

Responsibilities:

- Design interdisciplinary courses to K-6 that will be implemented in English.
- Develop the corresponding assessment system.
